Platinum products embody luxury, represent the best of the best, and are defined by premium features that set them apart from the competition.

Pride® Mobility is thrilled to introduce our second platinum mobility scooter, the **Victory® Platinum!** We have taken everything that made our Victory series popular and brought it to the next level.

PLATINUM FEATURES

Made in the U.S.A. – All of our Platinum units are proudly assembled by American workers at Pride Mobility's facility in Mississippi.

EZ Turn – Pride's patented, tight-turning technology, allows this 4-wheel scooter to turn like a 3-wheel scooter! With a 45.5" turning radius, it's the most agile 4-wheel Victory scooter we've designed.

Charge360 – Our exclusive magnetic charging technology is simple to use, as the charger easily secures into place without the need to align any pins to connect.

One-handed tiller adjustment – Located on the delta tiller, the newly designed, more user-friendly lever, makes it easier to adjust the angle of the tiller to your liking.

Full front and rear suspension – With robust front and rear suspension, this scooter is designed to keep you comfortable while traversing uneven terrain.

Additional Victory® Platinum features include, feather-touch disassembly, a maximum-intensity LED headlight, a 400 lb. weight capacity, and a top speed of up to 6 mph.

American ingenuity and craftsmanship define the Victory Platinum. Discover the difference this innovative mobility solution can make for your customers!
